

Agile Transformation

Agile Awareness Workshop

After this workshop you will be a lot more familiar with the Agile buzzwords such as Scrum, DevOps and SAFe. What do they mean? What is best for my organisation? An interactive training to demonstrate the practical application of the agile principles. You will get a good understanding of the benefits of an agile way of working.

Target audience: Organisations who are new to this subject and anyone interested in improving IT-development via agile.

Agile Product

We will show participants how to align strategic objectives and the manoeuvrability of a sprint. You will discover the added value of a Product Roadmap as a tool for stakeholder management, feasibility analysis and (pre)funding of Agile teams. You will also get a better understanding of what role the Business Analyst can play.

Target audience: Organisations who want to understand how product roadmap are effectively used in an agile business context.

Agile for Management Workshop

We challenge participants during this workshop to form a vision on the agile way of working. Using practical examples, we will provide insight in the impact on the organisation, its processes and employees. How can management stay in control in an Agile organisation? What are the benefits to be gained?

Target audience: Senior Management looking for the impact of working Agile while transitioning to an Agile way of working.

Agile Transformation Round Table

Many of our customers have already implemented an agile way of working. They are willing to share their experiences and best practices in a round table session. Your business needs are the starting point for this workshop. In a short time you will understand the required capabilities for your own Agile transformation.

Target audience: Product Owners and IT & Business Management in need of optimisation of their Agile Transformation.

Agile Coaching

Throughout your Agile Transformation we can offer coaching and guidance in your agile challenges both individually and in groups. We have a team of motivated and certified professionals.

Our Academy

Agile Business Analysis Training

This 3-day BCS course is aimed at experienced business analysts who want to have better understanding on how business analysis is applied in the context of the Agile philosophy, principles and techniques. You will use your existing business analysis knowledge and experience to explore how it is applied in an agile business environment. The course is based on a realistic case and allows you to practice applying the Agile approach within business analysis scenarios.

SAFe Agilist Training

The Scaled Agile Framework (SAFe) is an online interactive knowledge base for implementing an on Lean and Agile-based framework. This 2-day course examines the roles, activities, teams and organisational forms, which you can use in scaling to an agile way of working. You will learn how to lead an agile transformation on an Enterprise level and use the SAFe Framework in conjunction with Lean and product development.

Scrum Product Owner Training

The 2-day course 'Professional Scrum Product Owner' is a must for Product Owners. It deals with the principles of Scrum and the self-regulating (empirical) mechanism which underlies all Agile methods. A Scrum Product Owner is the visionary and motivator for the development teams.

During this course you will get the insight and tools you need to start as an independent Scrum Product Owner.

Scrum Master Training

The 2-day course 'Professional Scrum Master' is a must for Scrum Master. It deals with the principles of Scrum and the self-regulating (empirical) mechanism which underlies all Agile methods. A Scrum Master is the motivator to let development teams work independently and effectively.

During this course you will get the insight and tools you need to start as an independent Scrum Master.

Examination & Certification

Our Academy training Agile Business Analysis and SAFe Agilist will be concluded with a certification exam. For the Scrum training a certification exam is optional.
